

Press Release – 26 January 2022

Test Flying Academy of South Africa (TFASA) announces cooperation agreement with the South African Civil Aviation Authority (SACAA).

The aim of the partnership is to provide Test Flight Pilot and Test Flight Engineer services for the SACAA.

We hereby announce that the SACAA has appointed our organisation, Test Flying Academy of South Africa to provide test flight pilot and test flight engineer services as and when required by the SACAA.

The appointment commenced on 01 November 2021 and will endure for a period of two (2) years until termination on 01 November 2023. Subsequent to the appointment, a formal Service Level Agreement (SLA) was signed outlining all the detail, the deliverables and services that will be rendered to the SACAA during the course of the appointment. The signed SLA will be considered as a binding contract between the SACAA and TFASA.

Test Flying Academy of South Africa (TFASA) was created in 2003 as a South African company. The TFASA Group benefits from being commercially independent and politically neutral, which enable us to provide our customers' workforce with tailored solutions to meet their needs. Our capabilities include comprehensive aircraft and systems testing, evaluation and certification as well as specialist consultancy services, high-quality training, support, development and operational solutions across a multitude of aviation disciplines.

TFASA provides a wide spectrum of customer tailored Training courses ranging from Class 1 graduate courses for Test Pilots and Flight Test Engineers, Commercial Pilot training for airline cadets, to advanced Operational and Tactical training. As an approved Maintenance and Design Organization, TFASA also offers maintenance and modification of type-certified and non-type-certified aircraft (including ex-military platforms). TFASA is also the seller and distributor of select aircraft.

As the go-to provider of specialist flight testing and aviation training solutions for progressive nations across the world, TFASA has a core team of the very best in their fields – pilots, test pilots, engineers, instructors, strategists and support staff – and retain the services of highly-qualified consulting personnel so that we can flex to meet our clients' specific requirements. We are truly independent, with access to all the fixed- and rotary-wing aircraft, ground equipment, instructors, specialists and support operations we need to deliver the broadest range of services.
